

Epilepsy Zen: There Are No Stupid Questions

By Dr. Soon Kim

Epilepsy is a neurological disorder that affects the brain. It can cause seizures, which are sudden, uncontrolled electrical discharges in the brain. Seizures can vary in severity, from mild to severe. They can cause a variety of symptoms, including loss of consciousness, jerking movements, and confusion.

Epilepsy is a complex disorder, and there is no one-size-fits-all treatment. The best treatment for epilepsy will vary depending on the individual patient. However, there are a number of effective treatments available, including medication, surgery, and lifestyle changes.

Epilepsy-Zen Memoir: There are no stupid questions about epilepsy Zen and I can answer most through E-Zen meditation, an anthology of coping with epilepsy ... RP (Not Stupid Epilepsy-Zen Series Book 2)
